

# WAH YAN COLLEGE

HONG KONG KOWLOON

Dear Friends,

## Wah Yan's Dream For The Future

Our dream for the future of both Wah Yan Colleges is to help make our schools better centres of learning and formation of character.

In order to turn this dream into reality we need funding beyond what government can give. We wish to use the extra resources to help both the students and the teachers.

1. For the students (present and future) we would like to employ extra teachers so that we could, if possible, half the classes on English, Chinese and Mathematics. We would also like to have extra help to develop debates, drama, art, music, games and athletics, in other words, to provide a wider choice of subjects to students.
2. For the teachers, we wish to provide opportunities for their continuous growth and formation and to develop their professional skills, especially in Jesuit Reflective Pedagogy by supporting them financially in their sabbatical study leave. We would like to link up with Jesuit schools abroad and have teacher exchange programmes.

At present every one agrees that teachers are suffering from greater stress from work-load and dealing with all the changes and reforms. We need to address their concern which ultimately is our concern.

We believe that if we can make our dream a reality, then better standards of learning and character will be achieved in both WahYan Colleges. This is why we are making this fund-raising appeal to help us achieve this dream. We will appreciate your kindness, generosity and support. Should you wish to respond to this appeal or want more information, please contact our alumni Mr. Laurence Tse (email: [Itse@impark.com.hk](mailto:Itse@impark.com.hk) ).

Yours faithfully,

Rev. A. J. Deignan
